

SAFE & DRY

SD250/00991

BOX OF 20 SAFE & DRY SACHETS

R399.00

Protect your valuables from; high humidity corrosion, rust, condensation, bad odours, fungus, and mould. Use in: Gun safes, tool boxes, tackle boxes, storage spaces, filing cabinets, welding cabinets, etc . . .

SAFE & DRY absorbs excess moisture within your safe or toolbox thereby protecting contents from rust, mould and fungus. Moisture absorption rate is determined by factors such as climate and air flow i.e. gun-dry in a safe in the karoo will last longer than gun-dry in a toolbox in Durban. You will visually see it working as the bag fills with water.
